

DMC(IV)

DMC(IV)

NAME

dmc — network link with DDCMP protocol

DESCRIPTION

The DMC-11 allows local connection of PDP-11 systems over a high speed (up to 56 kb) link; or remote connection over leased (up to 19.6kB) or dialed (up to 4800 bps) lines. It implements the DDCMP data link protocol (which includes error control) in hardware. This driver handles several DMC-11 devices.

BUGS

There are quite a few bugs in the DEC microcode for the different versions of the DMC.
